

FISH TALES

August 2017

Haslemere Sub Aqua Club

Festival of Sport 2017

HSAC will be at The Edge on August Bank Holiday Monday 12-4pm offering everyone a go with a SCUBA diving regulator, sticking your head in a barrel of water (what kind of sea creatures might you see?!). You can also climb aboard one of our dive boats to sit at the helm and find out what kind of kit you need on a club dive boat.

All too soon

Time to take Cobra out of the marina again, after some excellent club dives over the past few sunny months! She's been in a great spot this summer just at the bottom of the ramp.

Hopper and Hounds

Another sunny 2017 summer Tuesday out on Club RIB Cobra. First dive on July 4th was on the small wreck of the Hopper, covered in plumose anemones and other colourful animal life, with plucky little tompot blennies defending their wreck holes, and surrounded by shoals of bib. Second dive was a potter around the rocky outcrop blocks of The Hounds, just west of Selsey Bill, in a recommended Marine Conservation Zone that contains the Hounds and the Mixon Hole

Perfect Day for a Dive

True summer's day, calm sea, hot sunshine, great visibility, and two lovely dive sites – a small wreck called the Hopper, and the Bracklesham Balls. A quick dip once back in the marina to disentangle a visiting yacht's propellor gave us the opportunity to check the lush growth of seasquirts, sponges and seaweeds on the floating pontoons!

Wraysbury in June

Traffic delays did at least allow for the torrential rain to pass and the sun was almost shining on Rob and David's training dives in Wraysbury lake on 6th June.

Springs at sea, so back to Wraysbury on 13th June for a few more training dives, and simply to get wet!
